

Water In an Amaryllis Bulb

Typically amaryllis bulbs bloom within 8 to 12 weeks after planting. Water well to initiate growth, then water sparingly until growth begins. It can take weeks, even a month or more, before green growth appears. Once growth begins, it's dramatic! A big amaryllis bulb (sized 32-34cm) can produce two or three stems, with each topped by four enormous flowers. For premium varieties of amaryllis bulbs in huge sizes and at wholesale prices, see Colorblends.com, or call 888-847-8637.
