

Crocus Tommies, *Crocus tommasinianus*

These purple-pink bulb flowers are named *Crocus tommasinianus* but most people call them "Tommies." The four-inch tall plants have egg-shaped blooms that open wide in the sun. Planted en masse, they create a carpet of color in late winter or very early spring. Tommies are easy to grow, flower prolifically and, in most settings, come back to re-bloom, year after year. Available from Colorblends.com, a Connecticut-based flower bulb wholesaler that sells direct to landscape professionals and home gardeners coast-to-coast with a minimum order of \$60. See Colorblends.com or call 1-888-847-8637.
