

Daffodil 'Tete-a-Tete'

Narcissus 'Tete-a-Tete' is a beautiful little daffodil that carries one to three bright yellow flowers per stem. It is a very early bloomer that stands only seven inches tall. All daffodils are considered deer and rodent proof. They contain a bitter toxic alkaloid called lycorine that animals know not to eat. Available from Colorblends.com, a Connecticut-based flower bulb wholesaler that sells direct to landscape professionals and home gardeners coast-to-coast with a \$60 minimum. See Colorblends.com or call 1-888-847-8637.
