

Paperwhite Narcissus 'Nir'

To grow paperwhites in water, partially fill a water-tight container with beads, stones or marbles. Arrange the bulbs on top, placing them close together, even touching. Add more beads, stones or marbles around the bulbs, leaving the bulb necks exposed. Add water to a level just below the base of the bulbs, so they'll "sniff the water" but not sit in it. A clear glass bowl makes it easy to monitor the water level and showcases the bulbs' dramatic root growth. Quality paperwhite bulbs are available at wholesale prices from Colorblends.com, with a minimum order of \$60. Visit Colorblends.com or call 1-888-847-8637.
