

## **Snowdrop, Galanthus**

Snowdrops (*Galanthus elwesii*) are the earliest bulb flower to bloom. Their pendulous, winged, white flowers appear at the tail end of winter, when it's not unusual to see them draped with snow. Deer and rodents leave snowdrops alone because they contain a bitter toxic alkaloid called lycorine. Available from [Colorblends.com](http://Colorblends.com), a Connecticut-based flower bulb company that sells direct to landscape professionals and home gardeners coast-to-coast, with a \$60 minimum. See [Colorblends.com](http://Colorblends.com) or call 1-888-847-8637.
