

Winter Wolf's Bane, Eranthis

Winter Wolf's Bane (*Eranthis hyemalis*, Winter Aconite) blooms in very early spring. Its yellow flowers are encircled by reflexed leaves that create a hulu skirt effect. Plant the bulbs in moist, humus-rich soil in settings that are part-sun or part shade. This is an excellent choice for naturalizing in woodland areas and under deciduous trees. The bulbs are very small. Plant plenty. They are deer and rodent resistant. Foraging animals generally avoid them. Available from Colorblends.com, a Connecticut-based flower bulb wholesaler that sells direct to landscape professionals and home gardeners coast-to-coast with a minimum order of \$60. See Colorblends.com or call 1-888-847-8637.
